

## Broadband distribution system

### Unitymedia

In order to guarantee that the services are successfully provided or restored, please make sure that our service technician has access to the broadband distribution system.

The Unitymedia broadband distribution system can usually be found in a publicly accessible basement room. However, in exceptional cases, it may also be located somewhere else, e.g.

- ✓ in an attic or loft
- ✓ staircase
- ✓ in a locked utility room
- ✓ washroom, bicycle storage room, etc.
- ✓ in a neighbouring house or in another property that is also being supplied
